PROGRAM DESCRIPTION

Entry Level Welding Technology is a 33 credit, 2-semester program with a diploma for the successful graduate. Students can continue in the Advanced Welding program to earn a 65-credit Advanced Welding Diploma.

PROGRAM LEARNING OUTCOMES

1. Build skills toward industry standards.
2. Build skills toward American Welding Society certifications.
3. Work as an effective and dependable team member as well as independently.
4. Demonstrate safe work habits that reflect concern and care for self, others, and the environment.
5. Develop the skills necessary to secure employment.

ACCREDITATION

The [American Welding Society \(AWS\)](#) was founded in 1919, as a nonprofit organization with a global mission to advance the science, technology and application of welding and allied joining and cutting processes, including brazing, soldering and thermal spraying. AWS strives to move the industry forward in both thought and action, as well as inspire new generations to see the exciting career opportunities available today.

PROGRAM NOTES

- The typical Welding Technology Program student applicant has had some experience with welding and cutting. However, students that have never welded before have successfully completed this program and have gone on to become certified welders.
- [Differential tuition is assessed for the WELD courses.](#)
